

Sluk ut de Lamp

This recipe originates from a Swedish doctor who lived for more than 100 years and who eventually died falling from a horse.

His family guarded the secret of the recipe for many decades and they all lived to be over 100 years old.

In the end the secret of the recipe was revealed for the benefit of all and those who mix it and take it regularly as a preventative remain free from illness or, if ill, can be cured by it.

Whether for aiding the cure in spring or autumn, keeping body and soul together, fortifying the nerves or for good circulation, 10 to 20 to 30 drops, diluted with wine, tea, water or some such, are to be recommended morning and evening. So taken, this Swedish elixir is an excellent preventative against many illnesses.

The elixir also works miracles for the health in other ways, for example in cases of rheumatism, complaints of the gall bladder, dropsy, headaches, haemorrhoids, digestive complaints, aching limbs, blocked arteries and for many other complaints.

For all such cases 10 to 20 to 30 drops are to be taken to begin with, increasing as required up to a teaspoonful and diluted in wine, tea, water or some such according to the size of the person and severity of the malaise....
